

LECTURER OF SOFTWARE SYSTEMS / PROGRAMMING

Artificial Intelligence Center at the Department of Computer Science FEE CTU opens a competitive call for applications for a lecturer of Software Systems/Programming.

JOB DESCRIPTION

You are expected to actively perform pedagogical activities in the field of software systems and programming, in particular **preparation and conducting of exercises, supervising** student work, or other activities related to teaching, such as **preparation of teaching and test materials**.

This means a high degree of **responsibility** but also the **unique opportunity to create knowledge profiles of future graduates**.

You will be working in an **interesting team of young scientific** and pedagogical staff at a renowned European university (and the oldest computer science department in the country). Expect a **competitive salary** corresponding to the performance in the field of pedagogy.

REQUIREMENTS

- **Master degree in technical fields** (such as software systems, computer science, software engineering, applied mathematics, etc.)
- Ability for **pedagogical work**
- **Fluent English**
- Theoretical and practical knowledge and experience with **software development in programming languages** Java, C, etc.

APPLICATION

- Structured curriculum vitae
- Copy of your diploma
- An overview of previous professional experience
- Publication record

Send us your application with the above to **takuskat@fel.cvut.cz**.

Start date? As soon as possible, but let's discuss it together to find what works best for both.
